Explore new concepts, techniques, and treatments in rehabilitative medicine, and learn advanced physical therapy skills taught by leaders in the field.

- Workshops concentrate on case studies and hands-on experience to enhance learning
- Participants rotate through three workshops of their choice
- Who should attend - canine rehabilitation professionals with 2+ years experience in rehabilitation and physical therapy
- Course level is intermediate-to-advanced
- Comprehensive workshops provide analytical approaches to treating the canine patient
- Small class sizes maximize full participation
